

Instructor: Jim Pham
Email: jpham@ohlone.edu
Webpage: <http://www2.ohlone.edu/people/jpham/>

Course Description:

This is an advanced course using **Visual Basic .NET** for design and development. Students will learn advanced features such as Object-Oriented Programming using classes and inheritance, database access using ADO.NET, SQL, and an introduction to ASP.NET, Web Forms, and Web Services. The students will develop a medium-sized business application involving an SQL Server database.

Prerequisites:

There is no prerequisite for this course, since many students may have had prior programming experience with Visual Basic, .NET, and/or C#. However, it is recommended that students either have taken CS-104A, the Introduction to Visual Basic .NET, or have equivalent knowledge of object-oriented programming and the basics of .NET.

Textbook:

Advanced Visual Basic 2005, 3rd
by Julia Case Bradley and Anita C. Millspaugh
McGraw-Hill/Irwin, 2005
ISBN-10: 0-07-351717-8

Course Schedule:

Week	Date	Topic
1	08/28/2007	Chapter 1 The .NET Framework, Course Overview, Review Visual Basic .NET, Classes
2	09/04/2007	Chapter 2 Building Multi-tier Programs with Classes
3	09/11/2007	Chapter 3 Windows Database Applications
4	09/18/2007	Chapter 4 Windows Database Using Related Tables
5	09/25/2007	Chapter 5 Windows Database Updates
6	10/02/2007	Midterm Exam on Chapters 1 to 5;
7	10/09/2007	Project Proposals
8	10/16/2007	Chapter 6 Web Services
9	10/23/2007	Chapter 7 Using Web Forms – ASP.NET
10	10/30/2007	Chapter 8 Web Forms Database
11	11/06/2007	Chapter 9 Writing Database Reports Using Crystal Reports
12	11/13/2007	Chapter 10 Using Collections
13	11/20/2007	Chapter 11 User Controls
14	11/27/2007	Group Project Presentations
15	12/04/2007	Group Project Presentations
16	12/11/2007	Final Exam Final Project Critique

Course Schedule Details:

This syllabus outlines the topics intended to be covered in specific classes during the semester. Actual topics may be modified depending on the class progress. All details are kept current and up to date on my web page. Refer to the course schedule web page regularly:

<http://www2.ohlone.edu/people/jpham/cs104b/cs104bfall07syl.html>

Email:

If you send me email, please put **course number – name – topic** into the email **Subject** field.

For example: CS104B – Name – DB Connection String

Cell Phone Etiquette:

You may have cell phones in class, but they must be put into silent ring mode. If you need to respond to a call, please leave the classroom.

Programming Assignments:

There will be programming assignments of one- or two-week duration, depending on the assignment's scope and difficulty. There is a group project that will span the second half of the semester.

Assignments are due at the beginning of the class on the due date.

Late assignments, up to one week late, will receive 50% credit. No credit for assignments turned in more than a week late. If, for business travel reasons, you are unable to be in class, notify me **prior** to the due date for an extension.

Final Project:

The final project is a demonstration of your ability to create an advanced and complete VB.NET application using the skills learned in the class. The development of this project begins mid-term and continues concurrently as you learn new material.

Policy on Student Work:

The programming assignments are to be done individually, unless a group project is specified. You are encouraged to talk to fellow students about concepts and methods, but you may not copy someone else's work. I adhere to the **Ohlone College Policy on Academic Integrity**.

Quizzes:

There will be quizzes on the reading assignments and on the prior week's material. There are no make-up quizzes; you will be able to drop the lowest two scores.

Exams:

There will be one midterm exam and one final exam. The final exam consists of your final project and its critique.

Grading:

Programming Assignments:	30%
Midterms:	20%
Quizzes:	10%
Class Participation	10%
Final Project/Exam	30%

Grading Scale:

90-100 = A; 80-89 = B; 65-79 = C; 55-64 = D; <55 = F
