

Instructor: Jim Pham
Phone: (925) 694-4360 (Day)
Email: jpham@ohlone.edu

Office Hours: By appointment only

COURSE DESCRIPTION: This course is designed to provide students with the knowledge and skills that are required to develop secure applications running on the Internet. The course focuses on the latest industry security mechanisms including Digital Signature, Public Key Infrastructure (PKI), and Secure Sockets Layer (SSL).

Prerequisite: CS-104A, CS-170

Textbook: *.NET Development Security Solutions* by John Paul Mueller, ISBN 0-7821-4266-4

INSTRUCTIONAL RESOURCES: At the main campus, the computer lab is located in room HH-119. The hours there are Mon. - Fri, 8 am – 9:30 pm, Sat 10 am – 4 PM. Program design and coding should be done before you arrive at the computer. In addition to the textbook, handouts may be distributed in class.

EMAIL: If you send me an email, you must include the course number, last name, and first name in the email subject line. For example: CS126 – LastName, FirstName

IMPORTANT DATES:

Last day to add a class	Sept 03, 2004
Last day to drop a class without a “W”	Sept 03, 2004
Last day to petition to complete a class on a “Credit/No Credit”	Sept 10, 2004
Last day to withdraw and receive a “W”	Nov 16, 2004
Final Exam	Dec 13, 2004

It is your responsibility to ensure that you officially withdraw from a class, which you do not intend to complete. Failure to do so may result in an “F” grade.

ATTENDANCE:

Each student is expected to attend every class and be present promptly at the scheduled start time. A student who stops attending is not automatically dropped from the class, although I have the right to drop a student who misses more than three classes.

POLICY ON STUDENT WORK:

Programming assignments are to be completed individually unless a group project is specified. You are encouraged to talk to fellow students about concepts and methods, but you may not copy someone else’s work. Clearly, similar documentation, comments, and variable names will strongly indicate whether two projects are copies. If submitted projects are substantially similar to each other, both copies are graded as zeros. If you are working on another reference source, cite it in your comments.

GRADING:

Programming Assignments	40%
Class Attendance and participation	10%
Quizzes	10%
Midterm	20%
Final exam	20%

Grading Scale:

A: 90-100%; B: 80-89%; C: 70-79%; D: 60-69%; F: 0-59%

MAKE-UPS:

There are no make-up quizzes. Make-up exams will be given only if arrangements are made prior to the exam date.

PROGRAMMING ASSIGNMENTS:

Programming assignments will be assigned each week and collected at the beginning of the class. All programming assignments must be applied, use naming conventions, incorporate standards, and indicate scope and data type. Late assignments will be given an immediate 20% point deduction. No credit will be given for any assignment turned in after it has been graded and returned to the class. You will submit all programming assignments on a ZIP disk, accompanied by the title page, for the instructor to evaluate.

Example:

Name: John Doe
 Class: CS126
 Assignment: 1
 Date Due: 08/17/2004
 Description: brief description
 Filename: file.vb, file.cs, file.aspx, ...

CLASS TIME DETAILS:

This is a 3-hour class, which meets on Monday. For each session, the first 2 hours is reserved for lecture and last hour for lab work.

COURSE SCHEDULE DETAILS:

This syllabus outlines the topics I intend to cover in classes during the semester. I may modify the actual topics depending on the class progress.

COURSE SCHEDULE:

Class Date	Topic	Project	Quizzes Date
08/17/2004	Chapter 1: Understanding .NET Security		
08/24/2004	Chapter 2: .NET Framework Security Overview	Project 1 due 09/07/04	
08/31/2004	Chapter 3: Avoiding Common Errors and Traps		Quiz 1
09/07/2004	Chapter 4: .NET Role-Based Security Techniques	Project 2 due 09/21/04	
09/14/2004	Chapter 5: Policies and Code Groups in Detail		Quiz 2
09/21/2004	Chapter 6: Validation and Verification Issues	Project 3 due 10/05/04	
09/28/2004	Chapter 7: .NET Cryptographic Techniques		Quiz 3
10/05/2004	Chapter 8: LAN Security Requirements	Project 4 due 10/19/04	
10/12/2004	Chapter 9: Web-based Security		Quiz 4
10/19/2004	Chapter 10: Web Data Security	Project 5 due 11/02/04	
10/26/2004	Midterm		Quiz 5
11/02/2004	Chapter 11: Securing XML and Web Services	Project 6 due 11/16/04	
11/09/2004	Chapter 12: Active Directory Security		Quiz 6
11/16/2004	Chapter 13 : Wireless Device Security	Special Project due 12/07/2006	
11/23/2004	Chapter 14: Win32 API Overview		
11/30/2004	Chapter 15: Win32 API Advanced Techniques		
12/07/2004	Review		
12/14/2004	Final Exam
