

Instructor: Dr. Jim D. Pham
Email: jpham@ohlone.edu
Webpage: <http://www2.ohlone.edu/people/jpham/>
Section: CS-173-01 (051599) (hybrid; 50% online);

Course Description:

This is an introductory course describing Java EE Architecture. Students will learn how to design enterprise Java beans and deploy them on a local server. The local server is Java EE 5. About 10 examples from simple- and medium-complexity applications will be discussed in class. We plan to use Eclipse or Oracle's JDeveloper IDE for the class.

Prerequisites:

CS 170 and good knowledge of Java programming, JSP, and servlets.

Course Materials: Blackboard is the primary method of communication for the course. Learning lessons, assignments, midterm, and final exam will be posted on <http://bb-ohlone.blackboard.com/>.

Textbook

Eclipse Web Tools Platform: Developing Java Web Applications
By: Naci Dai, Lawrence Mandel, Arthur Ryman
Addison Wesley, ISBN-10: 0321396855, ISBN-13: 9780321396853

Course Schedule:

Week	Date	Topic
1	1/23	Introduction to Java EE and EJB
2	1/30	Eclipse or Oracle's JDeveloper Install and Setup
4	2/6	JSP applications
5	2/13	Database access
6	2/20	Holiday: President's Day (Ohlone College closed, no class)
7	2/27	Web services
8	3/5	Web application Development
9	3/12	Midterm (online) and Service Oriented Architecture
10	3/19	Spring Break 3/19 - 3/25
11	3/26	Service Oriented Architecture(SOA)
12	4/2	Creating web Projects
13	4/9	The Presentation Tier
14	4/16	JSP application
15	4/23	The business Logic Tier
16	4/30	Session EJB
17	5/7	Special Topics
18	5/14	Final Exam (online)

Student Learning Outcomes

The students will:

1. Describe and examine distributed computing and Web Services.
2. Create business applications using EJB with local and remote interfaces.
3. Create business applications in threading, synchronization, and database connections.
4. Create applications with integration of XML, DOM, SAX, JAXP to EJB.
5. Use of JSP tags in Java EE applications.
6. Examine and use current tools in packaging and deploying business applications.

Course Schedule Details:

This syllabus outlines the topics intended to be covered in specific classes during the semester. Actual topics may be modified depending on the class progress.

Email:

If you send me an email, please put the **course number – name – topic** into the email **Subject** field.

For example: CS73 – Name – Issue

Cell Phone Etiquette:

You may have cell phones in class, but they must be put into silent ring mode. If you need to respond to a call, please leave the classroom.

Programming Assignments:

There will be programming assignments of one- or two-week duration, depending on the scope and difficulty of the assignment. There is a group project that will span the second half of the semester.

Assignments are due at the beginning of the class on the due date.

Late assignments, up to one week late, will receive 50% credit. No credit for assignments turned in more than a week late. If, for business travel reasons, you are unable to be in class, notify me **prior** to the due date for an extension.

Term Project:

A term project will be assigned during the course. A student may work on this project individually or in a group of two.

Policy on Student Work:

The programming assignments are to be done individually, unless a group project is specified. You are encouraged to talk to fellow students about concepts and methods, but you may not copy someone else's work. I adhere to the **Ohlone College Policy on Academic Integrity**.

Exams:

There will be one midterm exam and one final exam. The final exam consists of your final project and a final project critique.

Grading:

10 Lab Assignments (or 5 Labs and a term project)	40%	Class and BB Participation	10%
Midterm:	25%		
Final Exam	25%		

Grading Scale:

90-100 = A; 80-89 = B; 65-79 = C; 55-64 = D; <55 = F
