

Instructor: Dr. Jim D. Pham
Email: jpham@ohlone.edu
Office Hours: Friday at 4 PM, or by appointment
Web Page: <https://www.ohlone.edu/jpham>
Section: CS-102-11 (300809)

Course Description:

This course is an introduction to computer programming. Its primary objective is to teach problem solving using the C++ programming language. Emphasis will be placed on structured procedural programming with an introduction to object-oriented programming. This course is designed primarily for computer science and related transfer majors.

Lab: Required for this course. Please be ready to discuss the techniques demonstrated in the online lecture and explained in the textbook via Canvas.

Prerequisites: MATH-152 or MATH-153

Textbook: zyBooks - Introduction to Computer Programming Using C++

1. Sign in or create an account at learn.zybooks.com
2. Enter zyBook code: **OHLONECS102PhamSummer2026**
3. Subscribe

Canvas: Slide presentations, labs, and worksheets will be accessed through Ohlone's Canvas Course Management System. You access the online resource at this URL: <https://ohlone.instructure.com>.

Discussion Board: Participation on the Discussion Board (on Canvas) is important. You must post and respond to at least two posts per assignment.

Student Learning Outcomes:

After completing this course, students will be able to:

1. Employ the basic syntax and semantics to write programs.
2. Manage program flow by using conditional and iterative structures.
3. Construct programs modularly from subroutines/functions.
4. Construct programs with 'arrays', pointers, and other structures.
5. Demonstrate basic stream and file Input/Output.
6. Apply software development methodology to programming projects.

AI Acceptable Uses:

1. **General Queries:** Students are encouraged to utilize AI for thorough explanations and concise summaries of course topics, enhancing their understanding and grasp of the material.
2. **Assignment Assistance:** AI can offer valuable hints and guidance to help students think critically about their assignments, promoting learning without providing complete verbatim answers.
3. **Code Debugging:** AI serves as a helpful resource for troubleshooting and debugging in coding tasks, enabling students to refine their coding skills and improve their problem-solving capabilities.

Canvas ConferZoom:

Check Canvas ConferZoom for lectures and labs. Attendance is optional; archives will be available later.

Email:

If you send me an email, please put the **course number – name – topic** into the email **Subject** field.

Lab Assignments:

There will be engaging weekly programming assignments available on zyBooks and Canvas to help enhance your learning experience.

Lab Assignments are due on the due date:

Late assignments earn 50% credit; no credit for submissions over a week late. Notify me before the due date if you need an extension.

Policy on Student Work:

Programming assignments must be done individually, unless specified as a group project. You can discuss concepts with classmates, but copying work is not allowed. I follow Ohlone College's Academic Integrity Policy.

Academic Honesty:

This course will follow the [Academic Dishonesty and Procedure](#) as set by the College.

Quizzes:

There will be quizzes on the reading assignments and on the prior week's material. There are no make-up quizzes.

Grading:

Labs:	30%
Canvas Participation:	10%
Chapter Quizzes:	10%
Midterm Exam:	20%
Final Exam:	30%

Grading Scale:

A = 90-100
B = 80-89
C = 65-79
D = 55-64
F = <55

Course Schedule: The following is a tentative schedule. The instructor reserves the right to make any schedule changes deemed necessary.

Week	Date	Activity
1	06/15/2026 06/17/2026	Chapter 1. Introduction to C++
2	06/22/2026 06/24/2026	- Chapter 2. Variables/Assignments - Chapter 3. Branches
3	06/29/2026 07/01/2026	Chapter 4. Loops
4	07/06/2026 07/08/2026	- Chapter 5. Arrays / Vectors Midterm (Chapter 1 – Chapter 5)
5	07/13/2026 07/15/2026	- Chapter 6. User-Defined Functions - Chapter 7. Objects and Classes
6	07/20/2026 07/22/2026	Chapter 8. Pointers
7	07/27/2026 07/29/2026	- Chapter 9. Streams - Chapter 10. Inheritance
8	08/03/2026 08/05/2026	- Artificial Intelligence Final Exam
